Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  
☐ This opinion has been established on the basis of a translation from the original language into the following language  
\_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material  
☐ a sequence listing  
☐ table(s) related to the sequence listing
  - b. format of material  
☐ in written format  
☐ in computer readable form
  - c. time of filing/furnishing  
☐ contained in the international application as filed.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

The subject matters of claims 1-3, 7, 8 and 11 do not appear to be novel or to involve an inventive step, since they are described in document 1 cited in the ISR.

The subject matters of claims 4-6 do not appear to involve an inventive step in view of document 1 and document 2 cited in the ISR. Providing more than one bent portion of document 1 as described in document 2 is easy for a person skilled in the art.

The subject matter of claim 9 does not appear to involve an inventive step in view of document 1 and documents 3, 4 and 5 cited in the ISR. Employing means of pressing with a member having raised portions described in documents 3, 4 and 5 for forming the bent portion of document 1 is easy for a person skilled in the art.

The subject matter of claim 10 does not appear to involve an inventive step in view of documents 1, 3, 4 and 5 and documents 6 and 7 cited in the ISR. Forming the bent portion with a member having raised portions described in documents 1, 3, 4 and 5 in synchronization with heat sealing by heating and pressing as described in documents 6 and 7 is easy for a person skilled in the art.
